

# HOW TO MAKE A BOOK THAT TURNS INTO A POSTER (OR A MAP)

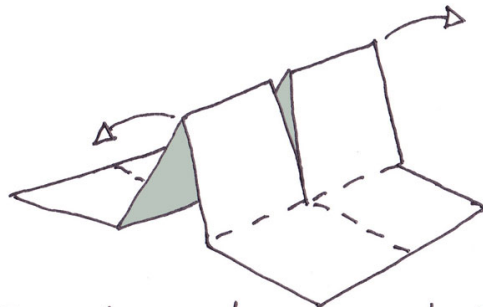

Fold into 8 sections

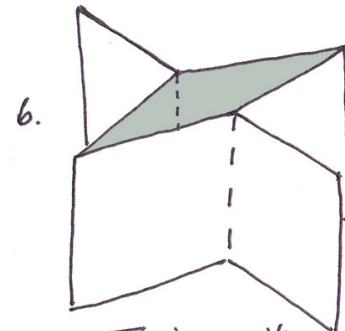

Your book pages will be in this order.

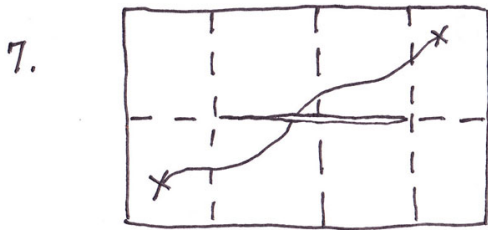

Fold your paper in half and cut from the folded edge in

Open the cut paper out, a bit like a butterfly's wings.

This will give you your book

Opened out flat it will give you your map/poster/drawing.

When you open your book it can have a map or a poster or a large-scale version of one of your illustrations or a set of instructions – or whatever you can imagine - on the inside. This is a lovely cheap way to make a small run of books because you can print them on a photocopier and then do the cutting bit.
